

# COMMUNITY & SATELLITE MEETINGS GMOD COURSE

DURHAM, NORTH CAROLINA  
NESCENT, MARCH 5-12

## GMOD Americas 2011

GMOD Americas 2011 is an 8 day gathering of the GMOD Community featuring a community meeting, satellite meetings, and a GMOD school. If you are looking to exploit (or just get a handle on) your recent or coming datasets, please consider attending one or more events at GMOD Americas 2011.

GMOD is a collection of open source software components for managing, visualizing and annotating biological data. It is also an active community of biologists and developers addressing common challenges with a shared tool set.

## Community Meeting

Two full days of presentations & discussion on GMOD components, best practices, and project direction, featuring GMOD users and developers. New, potential, and veteran users are encouraged to attend. A special project overview session will be held the night before to introduce new and potential users to the GMOD project.

## Satellite Meetings

One day of informal special interest group / birds-of-a-feather meetings where GMOD Community members discuss and work on topics of common interest.

## Spring Training

A five-day hands on course on GMOD component installation, configuration and usage. The course will cover many popular components, including annotation tools (**MAKER**, **Apollo**), visualization tools (**GBrowse**, **JBrowse**, **GBrowse\_syn**), database systems (**Chado**, **InterMine**, **Tripal**), analysis & data integration (**Galaxy**, **GFF3**).

March 4	Introduction to GMOD Session
March 5-6	GMOD Community Meeting
March 7	GMOD Satellite Meetings
March 8-12	GMOD Spring Training
